### **MEGA - Molecular Evolutionary Genetics Analysis**

In the field of molecular modeling, docking is a method which predicts the preferred orientation of one molecule to a second when bound to each other to form a stable complex. Knowledge of the preferred orientation in turn may be used to predict the strength of association or binding affinity between two molecules using, for example, scoring ...

n-Type OECTs for direct detection of lactate. Addressing these mutually stringent requirements in material and device design for enzymatic sensing of metabolites, we report the use of an n-type mixed conductor in an accumulation mode OECT for the detection of lactate.
