Fingerprint identification, known as dactyloscopy, or hand print identification, is the process of comparing two instances of friction ridge skin impressions (see Minutiae), from human fingers or toes, or even the palm of the hand or sole of the foot, to determine whether these impressions could have come from the same individual.

### **Fingerprint - Wikipedia**

The Profile analysis can be plotted on the scoring form. Purpose Though titled Parenting Stress Index, this instrument is a measure of overall child and/or parent maladjustment rather than stress per se. Results are useful in guiding decisions regarding whether or not professional intervention might be necessary.
