AIDSinfo | UNAIDS

In demographics, the world population is the total number of humans currently living, and was estimated to have reached 7.7 billion people as of November 2018. It took over 200,000 years of human history for the world's population to reach 1 billion; and only 200 years more to reach 7 billion.

World population - Wikipedia

The Population Division of the Department of Economic and Social Affairs of the United Nations has been issuing since 1988 revised estimates and projections of the urban and rural populations of all countries in the world and of their major urban agglomerations.

World Urbanization Prospects - Population Division

Life is a characteristic that distinguishes physical entities that have biological processes, such as signaling and self-sustaining processes, from those that do not, either because such functions have ceased (they have died), or because they never had such functions and are classified as inanimate.
